SUMMARY

Aspiring **Data Science Intern** with hands-on experience in **machine learning**, **computer vision**, and **data preprocessing** using **Python**. Proven ability to build end-to-end prototypes involving data collection, model logic, and evaluation. Strong foundation in statistics and ML concepts.

TECHNICAL SKILLS

- **Languages:** Python, SQL, Java
- **ML & Data Science:** Pandas, NumPy, Scikit-learn, OpenCV
- **Visualization:** Tableau
- **Tools:** Git, GitHub, Jupyter Notebook
- **Concepts:** Machine Learning, OOP, Probability, Statistics

PROJECTS

Smart Housing System - ML & Computer Vision (Python, OpenCV)

- Built a **face recognition** pipeline using OpenCV, achieving **95% accuracy** in controlled environments.
- Designed a rule-based aggression detection module to flag abnormal behavior in real-time video feeds.
- Integrated automation logic for environmental controls, simulating data-driven temperature and lighting optimization.

Netflix UI Clone (JavaScript, HTML, CSS)

- Consumed and processed **API-based movie metadata**, structuring dynamic data for UI rendering.
- Implemented client-side data handling for real-time content updates.

Pet Care Donation Portal (HTML,CSS,Javascript)

- Integrated Razorpay sandbox API and validated transaction flows using test datasets.
- Ensured accurate handling of payment data and user inputs.

EDUCATION

B.Tech in Computer Science - VIT Bhopal
Graduation: 2027

Relevant Coursework:

Probability & Statistics, DBMS, Data Structures, Software Engineering

CERTIFICATIONS

- Python for Machine Learning - Udemy
- Deloitte Data Analytics Job Simulation
- Generative AI Mastermind - Outskill
