SUMMARY

Data Analyst-oriented Computer Science undergraduate with strong skills in **Python, SQL, data visualization, and statistical analysis**. Experienced in transforming raw data into insights through projects involving automation, pattern detection, and dashboard-ready outputs. Seeking a **Data Analyst Internship** to support data-driven decision-making.

TECHNICAL SKILLS

- **Programming & Querying:** Python, SQL
- **Data Analysis:** Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA), Data Cleaning
- **Data Visualization:** Tableau
- **Tools:** Git, GitHub, Jupyter Notebook, VS Code
- **Concepts:** Statistics, Probability, DBMS, Data Structures

PROJECTS

Smart Housing System — Data & Security Module (Python, OpenCV)

- Analyzed live camera data to detect **behavioral patterns**, achieving **95% face recognition accuracy** in controlled conditions.
- Designed logic to classify aggressive behavior and trigger automated alerts, reducing manual monitoring effort.
- Simulated energy-usage data to optimize lighting and temperature automation, estimating **20% energy efficiency improvement**.

Netflix UI Clone — Data Integration Focus (JavaScript, HTML, CSS)

- Consumed and processed **API-based movie metadata**, structuring dynamic data for UI rendering.
- Implemented client-side data handling for real-time content updates.

Pet Care Donation Portal (HTML, CSS, JavaScript)

- Integrated Razorpay sandbox API and validated transaction flows using test datasets.
- Ensured accurate handling of payment data and user inputs.

EDUCATION

B.Tech in Computer Science - VIT
Expected Graduation: 2027

Relevant Coursework:

Data Structures & Algorithms, Database Management Systems, Probability & Statistics, Software Engineering

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation
- Python for Machine Learning - Udemy
- Responsive Web Design - freeCodeCamp
